

40MM FERRET® LIQUID AND POWDER BARRICADE PENETRATOR ROUNDS

SPIN STABILIZATION FOR MAXIMUM STAND-OFF DISTANCE

The Ferret® 40mm Round is a frangible projectile filled with chemical agent, designed to deliver in barricade situations from a 40mm launcher. Spin stabilization from barrel rifling affords maximum stand-off distance and accuracy for safety.

PRAETORIAN RIOT SUIT

The Ferret Liquid and Powder 40mm Rounds are non-burning and suitable for indoor use. Used primarily by tactical teams, they are designed to penetrate barriers, such as windows, hollow core doors, wallboard and thin plywood. Upon impacting the barrier, the nose cone ruptures and instantaneously delivers a small chemical payload inside of a structure or vehicle. In a tactical deployment situation, the 40mm Ferret is primarily used to dislodge barricaded subjects from confined areas. Its purpose is to minimize the risks to all parties through pain compliance, temporary discomfort and/or incapacitation of potentially violent or dangerous subjects.

FEATURES

- Spin stabilization which affords maximum stand-off distance
- Smokeless propulsion system with new black barricade projectile
- Effective range of 50 meters
- Improved accuracy and penetration at the target
- Operable from both the Defense Technology 1425 Single and 1440 4-Shot Launchers
